

EBU6304 – Software Engineering Group Project

Demonstration video and submission

You are required to record a short video (maximum 10 minutes) to demonstrate your software and submit it to QM+.

Requirements of the demonstration video:

- Recording can be made using any screen capture software. For example: Kaltura Capture is available from QMUL: <https://elearning.qmul.ac.uk/guide/screen-capture-qmplus-media/>.
- No more than 10 minutes.
- You do not have to record yourself in the video.
- You should demonstrate the running of your software, as if you do the demonstration live. You should demonstrate the operation of all functions. It's recommended to demonstrate error handling as well.
- You need to explain your demonstration in the video, you can do so by either record your voice or provide subtitles, must be in English.
- The video format does not matter, as you will upload it to QM+ Media.

Video submission via QM+ (a video assignment):

- Step 1 Uploading a video to your My Media area (if using Kaltura Capture you can click the upload button), see the guideline: <https://elearning.qmul.ac.uk/guide/uploading-a-video-to-your-my-media-area/>
- Step 2 Submitting a video assignment, see the guideline: <https://elearning.qmul.ac.uk/guide/submitting-a-video-assignment/>

Use default settings for both steps should be fine.

Only **one group member** should submit the video on behalf of the group.
